

TeleNeuroHospitalist provides expert follow-up for admitted neurology patients, preventing unnecessary transfers.

CHALLENGE

With the national shortage of neurologists, many hospitals do not have the ability to staff 365 days of follow-up and rounding coverage. There is a high level of burnout with many of these physicians covering both inpatient and clinic settings.

SOLUTION

TeleNeuroHospitalist service completes the continuum of care with comprehensive Providence TeleStroke and Emergent Neurology services.

Patients are connected early with neurology consultants to improve overall outcomes.

The service is available every day from 8am-5pm with 24/7 cross coverage.

QUALITY

Expert neurology care across the inpatient stay.

- Expert imaging, labs, and neurological evaluations.
- Continuity of care with less hand-offs.
- Board-certified neurology team, experts in stroke follow-up.

ACCESS

Daily rounding and follow-up care for admitted patients.

- Consults available 365 days per year.
- Keep the patient local when safe and advise transfers to a higher level of care when needed.

VALUE

Patients can be cared for a lower cost facility.

- Filters high acuity patients appropriately.
- Reduced cost of onsite call coverage.

EXPERIENCE

Sites and families feel supported.

- Access to data dashboards and quality reviews.
- Improvement of site support with an increase of clinical scope.
